

Nargiz S.

junior frontend dev.

download cv

When I was 14-15 years old, I used to "play" with HTML. Just for pure fan. I would make section Menu in kpop fan communities of VKontakte, and I could do it for hours. But at this time I never considered this hobby as a future career. And no one around me, including my parents, too, even though they knew I loved it. But during COVID-19, after getting Master's degree in Bussines-communication, I fell in love with programming once again. I tried all kinds of free tutorials and realised I still can do it. Now, I intend to become **THE** software-engineer, who knows theirs work very well!

- 😊 Got both creative and analytical skills
- 🧐 Pretty diligent and patient
- 👉 Open-minded, can work with people from diverse backgrounds
- 🍥 "Naruto taught to never give up"

contacts:

- 📍 magnitogorsk/ufa, russia

code examples

```
let weight = 5;
let recommendation;
if (weight<4) {
  recommendation = 'Пора перекусить'}
if (weight >= 4 && 5.5) { recommendation = 'Вес в норме'}
if (weight > 5.5) {recommendation = 'Пора на тренировку'}
(sample from HTML Academy simulator)
```
